Freedom of Information request – procurement of websites

Your request is:

All companies and delivery partners you have procured services or products that require a website as part of the tender requirements please. Can we please receive these to my email via electronic format.

Can we have the following information

Business Name

Telephone number

Point of contact for the company

Website address

Email

Projects name if applicable

Type of procurement service/ product

You subsequently clarified via One North East that you are only interested in 'live' projects and programmes, so it is acceptable to limit responses to the last full financial year

Information requested

The information you have requested is set out on the spreadsheet attached. As well as directly procuring websites, SEEDA also provides funding to devolved programmes that may in turn commission websites to support their work. The details provided here are for websites directly procured by SEEDA or with SEEDA's involvement or where SEEDA is named on the contract.

Please note that this is the information that we have been able to retrieve within the appropriate limit of £450 (calculated at a rate of £25 per hour of staff time). If you would like SEEDA to continue to spend time retrieving information for this request, please let me know and SEEDA will issue a fees notice for this work.

Where a named contact for the company is not provided – this is either because SEEDA does not hold the information or we do not have consent to provide it and have therefore withheld the information under section 40 of the Freedom of Information Act (the personal information exemption).
